Juan Guillermo Valdes Chacon

Head of Application Architecture at Axity | Tech MBA | McKinsey Alumni | Technology Strategist | GenAI & Cloud

Medellín, Antioquia, Colombia

Extracto

My career as a Solutions Architect has been a continuous journey: from writing code to defining technology strategy at the executive level. Today, my focus goes beyond designing resilient systems; I am dedicated to ensuring that every technical decision generates a real, measurable impact on profitability (ROI) and business agility.I have had the privilege of collaborating and transforming technological environments in top-tier firms such as Axity, McKinsey & Company, Globant, and Accenture. Throughout this journey, I have learned that true innovation does not stem merely from adopting the latest technology, but from aligning technical excellence directly with corporate objectives. In my projects, Cloud and AI have been more than just a shift in mindset and innovation—they are strategic tools to optimize operational costs and accelerate time-to-market.My key differentiators:- Hybrid Vision (Tech + Business): Having completed my Tech MBA, I combine my technical expertise in architecture with an executive mindset. My greatest strength is acting as a bridge: I translate complex corporate needs into clear, actionable technology roadmaps for the C-Suite.- People-Centric Leadership: I firmly believe that culture defines the success of a project. I lead cross-functional teams by creating environments of safety and trust, where talent is empowered and processes are optimized to maximize continuous value delivery.- Smart Efficiency & Scalability: I design architectures that grow at the same pace as the business, always ensuring a balance between technical performance, operational capacity, and financial governance (FinOps).I aim to lead strategic initiatives that redefine how companies compete, innovate, and win in the digital landscape.Specialties: AI | Cloud Strategy | Technical Leadership & Talent Management | Digital Transformation | Cost Optimization & P&L (FinOps) | Enterprise Architecture.

Experiencia

axity

Head of Application Architect for Colombia

octubre de 2025 - Present (1 año 1 mes)

Medellín, Antioquia, Colombia

- Strategic & Technological Leadership: I define and lead the technical roadmap, ensuring that architectural and technological decisions enable long-term scalability and deliver a direct impact on business objectives.

- Financial & Operational Governance: I support budget management and the P&L (Profit and Loss) of technology initiatives. I conduct comprehensive cost tracking, ensuring project profitability without compromising quality or scope.

- Quality & Productivity Management: I establish and monitor team performance metrics and delivery quality. I optimize workflows to ensure high productivity levels and an efficient Return on Investment (ROI) for each project.

- Talent Development & Leadership: I act as a mentor for architects and technical leads. I foster a culture of excellence, continuous improvement, and psychological safety, prioritizing the team's well-being and professional growth.

- Modernization & Cloud Architecture: I drive the migration and evolution of systems to the cloud, streamlining operations so technical teams can reduce operational overhead and focus on creating value-driven solutions.

- Applied Innovation: I incorporate Generative AI solutions and emerging technologies into our processes, solving complex business challenges and accelerating our delivery times.

McKinsey & Company

Specialist, Software architect

junio de 2023 - junio de 2025 (2 años 1 mes)

Medellín, Antioquia, Colombia

- I led cross-functional development teams in the design and implementation of innovative technology solutions using Java and Nest.js
- I defined and enforced compliance with established architecture principles and reference architectures, ensuring consistency and integrity across all projects
- I led vendor selection and technical evaluations, meticulously evaluating solutions based on project requirements and technical standards

- I collaborated with the product team in defining OKRs and KPIs to ensure the alignment of technological solutions with the company's strategic objectives
- I contributed to the establishment of Key Results (KRs) for the development team, fostering a culture of high performance and results- driven focus

Globant

1 año

Technical lead

octubre de 2022 - mayo de 2023 (8 meses)

Medellín, Antioquia, Colombia

During my tenure as a technical leader and architect for the Taulia project, I spearheaded the creation of microservices using Java and Spring Boot. These services were seamlessly integrated with PostgreSQL databases and deployed on Cloud Foundry for optimal scalability and performance.

One of the notable achievements during this project was the successful implementation of workflow automation using iFlows within the SAP environment. This integration significantly enhanced operational efficiency and streamlined critical business processes.

My role as a technical leader and architect allowed me to contribute to the project's success by designing robust and efficient solutions, fostering innovation, and ensuring the seamless execution of technical strategies.

Technical lead

junio de 2022 - septiembre de 2022 (4 meses)

Medellín, Antioquia, Colombia

As the technical leader of the LATAM development team for the Wizink project, a prominent digital bank in Europe, I played a pivotal role in providing comprehensive support to the team. My primary responsibilities revolved around guiding and assisting the team in the development of microservices and the implementation of the hexagonal architecture.

This involved designing and architecting robust, scalable, and highly performant microservices to meet the specific needs and challenges of the project. The implementation of the hexagonal architecture further enhanced the modularity and maintainability of the software, ensuring a seamless and efficient development process.

My leadership and technical expertise were instrumental in driving the success of the Wizink project, contributing to the digital transformation of banking services in Europe.

Cobiscorp
Solution Architect
julio de 2021 - abril de 2022 (10 meses)
Medellín, Antioquia, Colombia

During my role, I had the privilege of leading two distinct teams, each consisting of approximately 10 skilled developers. This leadership role allowed me to shape and define architecture guidelines, charting a clear and strategic roadmap for both teams.

One of my primary responsibilities was to meticulously analyze and interpret various architectural requirements, aligning them with the specific needs and goals of our clients. I would engage directly with clients to gain an in-depth understanding of their functional requirements. With this knowledge in hand, I would then leverage my expertise to craft well-informed architectural proposals, optimizing both the architectural design and implementation costs.

Furthermore, I took on the role of a mentor, guiding and imparting knowledge to the developers within my teams. I was dedicated to equipping them with the necessary skills and proficiencies in various technologies, nurturing their professional growth and enhancing their capabilities.

SuRed, la red de los colombianos
Solution architect
marzo de 2020 - abril de 2021 (1 año 2 meses)
Medellín

I took on a pivotal role in the company, spearheading the definition, design, and implementation of cloud-based architecture on AWS. This architectural transformation was geared towards migrating monolithic software to a more agile and efficient microservices structure developed in Node.js.

My responsibilities encompassed the end-to-end implementation of various DevOps guidelines throughout the organization. This included streamlining development and operations processes, fostering a culture of automation, and optimizing deployment pipelines.

Furthermore, I had the privilege of leading a dedicated team consisting of approximately 15 developers and three technical leaders. Together, we crafted innovative architecture solutions for a range of internal projects, furthering the company's technological capabilities and enhancing its competitive edge.

Accenture Colombia
Application Development Analyst
febrero de 2018 - febrero de 2020 (2 años 1 mes)
Área metropolitana de Medellín

During my tenure at Accenture, I contributed to a diverse array of projects, each bringing unique challenges and opportunities for growth. One of the standout projects involved the global digital transformation of an airline. This endeavor brought together international teams, fostering collaboration among professionals from various countries. My role in this context allowed me to leverage my expertise as a data architect, collaborating on complex tasks such as ETL processes, Big Data technologies, and Python. I was deeply involved in client interactions, managing and scrutinizing user stories to ensure their effective development and implementation.

In another remarkable experience, I served as a data architect for a hydroelectric project. This role enabled me to delve into areas like ETL processes, Big Data, and Python programming. It also required me to engage with clients, overseeing and validating the user stories slated for development.

Lastly, my journey at Accenture culminated in a pivotal role within a banking project. Here, I led a dynamic development team in crafting various microservices and played a central part in shaping the foundational architecture for the bank's digital transformation. This multifaceted experience equipped me with a well-rounded skill set and an understanding of the intricate dynamics of large-scale IT projects.

Farmalisto
Desarrollador IT Senior
febrero de 2017 - enero de 2018 (1 año)
Bogotá, Distrito Capital, Colombia

Training the team to implement Scrum methodology in which I perform as Scrum Master. My commitment is to help and guide the team to achieve there goals in each sprint.

Design and implement functionalities for the new Back-office modules that allow integration with different providers through webservices.

Ensure the system to works well by applying good development practices.

Mobile development through IONIC 2.

Training the members of the working group on SOA.

Training the IT team about the benefits of Implementing an SOA architecture that provides greater stability and performance in the developments area.

CDI Interactive
Ingeniero de desarrollador Back-end
diciembre de 2015 - febrero de 2017 (1 año 3 meses)
Bogotá

- Desarrollo de aplicaciones en Laravel y Yii Framework.
- Creación de módulos para Drupal 7 y 8.
- Desarrollo de Servicios Web.
- Análisis y levantamiento de requerimientos para nuevas definiciones de las aplicaciones generadas a empresas multinacionales.
- Acompañamiento al cliente en el desarrollo de nuevos módulos al sistema.
- Implementación de buenas practicas de desarrollo utilizando patrones de diseño basados en arquitectura SOA.

IATAI Enterprises
Desarrollador Senior PHP - Java
abril de 2015 - noviembre de 2015 (8 meses)
Bogotá

Web developer.

Creación de módulos para Drupal, Magento, creación de aplicaciones mediante Zend Framework 2 y Java Server Faces.

Implantación de reglas de seguridad basadas en la comunidad OWASP.

Aplicación de patrones de diseño GRASP

sancho bbdo
Ingeniero de Sistemas
abril de 2014 - enero de 2015 (10 meses)

Bogotá

Desarrollador de Interfaces, desarrollo de servicios utilizando PHP, base de datos no relacional como MongoDB, integración de conectividad con redes sociales, manejo de servidores tales como Amazon y Gearman para la ejecución de tareas.

Universidad Manuela Beltran
Ingeniero Desarrollador PHP
agosto de 2013 - abril de 2014 (9 meses)
Bogotá - Cajica

Desarrollador PHP, Node.js, Zend Framework, jQuery, Javascript, Css3, HTML5

Universidad Pontificia Bolivariana
Analista de proyectos
diciembre de 2012 - agosto de 2013 (9 meses)
Bucaramanga, Colombia

Soporte a los sistemas que se manejan en el Dpto. de Extensión Universitaria.
Implantación de nuevas estrategias que ayuden a la solución de tiempos de respuesta en los procesos a realizar.

Universidad Pontificia Bolivariana
Programador de Sistemas
agosto de 2011 - octubre de 2012 (1 año 3 meses)
Bucaramanga, Colombia

Analizar, crear he implementar modalidades de sistematización a los procesos que se ejecutan actualmente en la Universidad.
Administración de las bases de datos.
Actualización constante del portal web de la UPB seccional Bucaramanga.

Universitaria de Investigación y Desarrollo - UDI
Webmaster
octubre de 2007 - julio de 2010 (2 años 10 meses)

Administración de los servidores.
Administración Bases de datos.
Desarrollo de software.
Actualización página web de la UDI.
